LUCIE KAAS

## OUR INSPIRATION

We believe your home is yours and no one else's. We believe that personality is the most essential element to building a base and place that is uniquely yours.

Lucie Kaas has an eye for understated design that draws its influence from multiple sources crossing fashion, music, art, pop culture and interiors.

We collaborate selectively with designers, brands & celebrities whose identities fit our value set. We believe in the power of design to communicate, inform, and influence our decisions and want to create products that make you think.

Lucie Kaas was founded in 2012 by Esben & Ellora Rasmussen. With the duo's different backgrounds, they believe that though physically located in Copenhagen, Lucie Kaas could be from anywhere in the world.

## MILK

With MILK, tableware has never been more delicious. The material of the series, opal glass, is known for its 'foggy' look, giving it a milk-ish touch, hence the name for the collection. The range of colours invites to experiment with different combinations dictated only by creativity and moods.

## BORDFOLK

Everyone from the youngest design enthusiast to the adult finding the child within will be able to find an egg holder matching their personality. Each egg holder has been given a little more life with individual names and personalities to match them. Whether you're serving a small snack or a full breakfast, this collection will help bring a little joy to the table in the form of a playful but functional design.

## PAIPA

The arch that inspires Paipa has roots in Roman architecture and is a structure that has been admired by generations of architects. What would seem like a collapsible anatomy is defied by the arch and perhaps why it seems majestic.

The arch has inspired many of the world's best-known monuments and is also an element present in Samoan architecture, where the inspiration for the name Paipa has come to life as a direct translation of tube in the native language.

## FUMARIO

The Fumario series merge geometric shapes together with industrial design. The series can be used just as it is or as small pieces of art for the home.

## SKETCH.INC FOR LUCIEKAAS

Sketch.inc by Lucie Kaas is a whimsical world inspired by geometric expression, Japanese illustration and Nordic aesthetics. Some designs are born from Becky's own fantasy, while others are caricatured icons from the art, music, design and historical world as a celebration of cultural personalities.

## THANKS FOR EXPLORING OUR WORLD

When Esben and I started Lucie Kaas the main objective was giving a platform for things we like, items inspired by our moods, travels, and the people we met. Our home is just as eclectic, a mix of experiences, mementos, and memories.

We have realized, through time, that our choices have been guided by a simple principle - spaces & homes should be decorated with objects that have a unique sentiment that express the owner's personality. For what is a home if it isn't uniquely yours?

Sincerely.

Ellora & Esben
